CAREER OBJECTIVE

Enthusiastic and motivated Artificial Intelligence and Machine Learning undergraduate student who is at the beginning of my technical journey. Interested in software development, data analysis, databases, algorithms and problem solving. Eager to learn new skills, work on practical projects, and gain real-world experience. A curious learner with a positive attitude and willingness to improve.

EDUCATION

A J Institute of Engineering and Technology — Mangaluru, Karnataka, India
Bachelor of Engineering (B.E.) in Artificial Intelligence & Machine Learning
Expected Graduation: 2027 | CGPA: 8.38 / 10

St. Aloysius PU College, Kodialbail — Mangaluru, Karnataka, India
Pre-University Course (PCMC) | Percentage: 91.67 %

Ladyhill Victoria Girls High School, Urwa — Mangaluru, Karnataka, India
SSLC (Karnataka State Board) | Percentage: 95.04%

TECHNICAL SKILLS

Programming Languages: Basics of Java, Python, HTML, CSS, SQL ,C ,C++

CERTIFICATIONS

Python Fundamentals
Python Data Structures and Algorithms
HTML - Advanced — Infosys Springboard
Artificial Intelligence for All
Introduction to MS Excel — Microsoft simplilearn
Introduction to Gen AI Studio — GoogleCloud simplilearn
Data essentionals with Python — Cisco Networking Academy

INTERNSHIP

Thiranex — DataScience Intern
Aug 2026 - Sep 2026
Worked on exploratory data analysis and data preprocessing.
Performed data cleaning, visualization, and analysis using Python.
Created visualizations to identify patterns and generate insights.
Documented project methodology and results.

PROJECTS

Supermarket Sales Analysis — Python, Pandas, NumPy, Matplotlib, Seaborn, Google Colab

- Analyzed supermarket sales data to identify sales trends and meaningful business insights.
- Performed data cleaning, including handling missing values, duplicates, text, dates, and outliers.
- Conducted exploratory data analysis and created graphs and visualizations.
- Prepared visual reports and summarized key findings from the dataset.

Used Car Price Prediction — Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Google Colab

- Developed a machine learning model to predict used-car prices based on relevant vehicle features.
- Performed data preprocessing, cleaning, and exploratory data analysis.
- Applied regression techniques and evaluated model performance.
- Created visualizations to understand relationships between car features and prices.
